

## MORNINGTON RAILWAY RUNNING DAYS 2012

Month	Day/Date	Event
<p>Please Note: Our steam locomotive K163 is scheduled to operate on all running days except where noted as "Diesel Days".                      The last service of the day will continue to be hauled by our heritage diesel locomotives for the December Timetables.                      Heritage diesel will replace steam when the steam locomotive is not in service and on days of Total Fire Ban, and, at the discretion of the society, when extremely high temperatures are forecast or where the days previous to a running day have recorded high temperatures.                      All timetable details may change without prior notice.</p>
